Abhishek Kumar Mishra

abhishekind711@gmail.com | +91 6204957116 | Mohali, Punjab, India

Portfolio | LinkedIn | GitHub

OBJECTIVE

Ambitious fresher with a strong interest in Data Analytics, Big Data and business intelligence. Capable of turning data into actionable insights to improve performance and efficiency. Looking for an opportunity to learn, innovate, and add value through data-driven solutions. Committed to continuous learning and staying updated with emerging data technologies and industry trends.

EDUCATION

Master of Computer Applications | CGPA - 6.7 (Up to 3rd Sem) — **Expected May 2026**
Chandigarh University — Mohali, Punjab, India

Bachelor of Science Honours (Mathematics) | CGPA - 7.43 — **August 2023**
Lalit Narayan Mithila University — Darbhanga, Bihar, India

Intermediate (CBSE) | CGPA - 7.01 — **July 2020**
Rose Public School — Darbhanga, Bihar, India

SKILLS SUMMARY

Technical Foundations: Python, SQL (MySQL), MongoDB, REST APIs, HTML & CSS

Data Processing & Analysis: PySpark, Pandas, NumPy, Matplotlib, Plotly, Exploratory Data Analysis

Statistical Modelling & ML: Regression, Classification, Seaborn, Scikit-Learn

Visualization & BI Tools: Power BI, Advanced Excel, Databricks, Tableau

PROJECTS

Netflix Content Analysis | Link — **Python, Pandas, Power BI & DAX**

- Performed end-to-end Netflix content analysis using Python to extract insights on genre trends, content growth, and regional distribution.
- Developed an interactive Power BI dashboard with DAX to present KPIs like content count, ratings breakdown, and year-wise trends for better decision-making.
- Cleaned and transformed raw dataset using Pandas by handling missing values, duplicates, and data inconsistencies to ensure accurate analysis.

Climate Data Visualizer (ClimaView) | Link — **Python, Dash, Pandas, Pandas & APIs**

- Built an interactive climate analytics dashboard using Python and Dash to analyze temperature trends, rainfall patterns, seasonal variations, and sea-level changes.
- Integrated real-time weather APIs and used Plotly for dynamic visualizations, enabling users to explore climate insights across multiple regions.

Product Sales Data Analysis | Link — **Power BI, DAX, Power Query**

- Developed an interactive Power BI dashboard to analyze sales performance, profit trends, and regional distribution using KPI metrics like Total Sales, Profit, COGS, and Profit Margin.
- Built visualizations including line charts, bar charts, tree maps, and maps, and applied data cleaning with Power Query and DAX for accurate insights.

CERTIFICATE

- Master Data Analysis with Python: From Beginner to Pro – Aug 2025 | Udemy
- Introduction to Data Analytics by IBM – Aug 2025 | Coursera
- University of Michigan "Python Specialization – July 2025 | Coursera
